RE: Confirmation of Effort commitment on Grant project

This is to acknowledge that Mr. Andrei Pogangeanu is member in the research team on my grant project entitled "Does Brain Metabolic Reorganization Predict the Functional Recovery Following Decompressive Surgery in Patients with Cervical Spondylotic Myelopathy?" This project is sponsored by AOSpine International. The project dates are 7/1/2010 - 7/1/2011. The overall goal of this project is to investigate the value of assessing the brain metabolic status in predicting recovery in cervical spondylotic myelopathy. Mr. Pogangeanu's role on this project involves overseeing the

functional and clinical testing of the recruited patients, including data analysis and interpretation as well as manuscript preparation.

Please don't hesitate to contact me if you have any questions or need further information.

Sincerely,

Sorin C. Craciunas M.D.
